I have done minor changes to CB 2.0.4 modified version that can be downloaded from this site. Thanks for all who commented and gave feedback to my blog. List of changes made is as follows:

- Extra sql string to check if avatar contains nophoto.jpg
- Tiny cosmetic change in the search template
- Sql error fix if "avatar only search" is enabled and user only checks that option and leaves other search criteria (if any) empty. More details about this component and how to install and use it can be found at the following url: <http://tech.amikelive.com/node-6/community-builder-advanced-search-search-by-age-interval-and-avatar-only-unofficial-hack/>
